FOR CUSTOMERS · 30 OCTOBER 2026

Customer Guide

Verified Help. Anytime. Anywhere.

This guide shows you how to book a verified professional for jobs at home: plumbing, electrical, cleaning, AC and appliance repair. It takes about five minutes to read.

Where: jihajoor.com in any browser, or the Ji-Hajoor app on Android and iOS.

---

1. Create your account

1. Open Ji-Hajoor and tap **Sign in**.
2. Choose how to sign in:
   - **Mobile number:** enter your number and type in the 6-digit code we text you.
   - **Email:** enter your name, email, mobile number and a password, then the code we email you.
   - **Google:** one tap with your Google account.
3. Your password must have at least 10 characters, with at least one letter and one digit. We refuse passwords that are easy to guess, such as `password123`, `qwerty12345` or your own name.

Ji-Hajoor will never ask for your password or sign-in code on a call or in a message. Keep them to yourself.

2. Book a service

1. On **Home**, pick a category (for example *Plumbing*) or search for a service.
2. Pick the job (for example *Tap / Faucet Repair*). You see a starting price and how long the job usually takes.
3. Tell us **where**: choose a saved address or add a new one.
4. Tell us **when**: choose a date and time. If the job can't wait, choose **Emergency** (only some services offer it). An emergency booking is matched first and costs more.
5. Describe the job if you like (for example "kitchen tap leaking at the base").
6. Check the **price estimate**. It lists every part of the price: base price, travel, any emergency, night, weekend or busy-time charge, the platform fee and taxes. If you have a **coupon**, apply it here.
7. Tap **Review & confirm**. You get a booking reference straight away.

3. While we find your professional

- Ji-Hajoor offers your job to the best-matched verified professionals near you. As soon as one accepts, you see their name, rating and a **See profile and reviews** link.
- If nobody nearby is free, a partner agency assigns one of its verified team. If still no one is available, we tell you and nothing is charged.

4. On the day

- **Track:** open the booking and tap **Track** to see your professional on the map as they travel.
- **Chat:** tap **Chat** to message them, for example to share the gate code. Messages stay with the booking, so you can look back at them later.
- **Extra parts:** if the job needs parts, the professional adds them, and you **approve the new total** in the app before anything changes. You never pay for something you did not approve.

5. Pay and get your invoice

1. When the professional marks the job complete, you see the final amount.
2. Pay by **UPI, card, net banking or wallet**. Payments are processed by Razorpay; Ji-Hajoor never sees or stores your card details.
3. Your **invoice** (with GST) is ready to download from the booking right after payment.

6. Rate your professional

Your rating helps good professionals get more work and helps other customers choose.

- After you pay, the booking shows a **Rate this job** card. Give an overall star rating; the four details (quality, timeliness, behaviour, price transparency) start at your overall score and you can change them. Add a comment if you like, up to 1,000 characters.
- Jobs waiting for your rating also appear on **Home**. If you forget, we send **one** reminder the next day. We never send more than one.
- Your review appears on the professional's public page **without your name**. The professional may reply publicly.
- Reviews from very new accounts, or ones that look unusual, are checked by our team before they appear.

7. See a professional's public page

Every verified professional has a public page showing their skills, experience, agency (if any), star rating with a breakdown, and recent reviews with their replies. Open it from your booking, or from a link a professional shares with you. You can book from that page with **Book a service**.

8. Cancel, or report a problem

- **Cancel:** open the booking and tap **Cancel**. Cancelling is free until a professional is on the way; after that a cancellation fee may apply, and the app shows the amount before you confirm.
- **Problem with a job:** open the booking and choose **A problem with a booking**. Describe what went wrong; our support team follows up and can approve a refund to your original payment method.

9. Your account

On **Profile** you can manage your saved addresses, change your password and sign out. **History** lists all your bookings. **Help & support** answers common questions.

Staying safe

- Pay only in the app. Never pay a professional in cash unless the app asks you to.
- Professionals carry a **Verified by Ji-Hajoor** badge: they passed document checks and a background check.
- Sign-ins and payments always use `https://jihajoor.com`. If a link looks different, don't use it.

© 2026 Ji-Hajoor. Verified Help. Anytime. Anywhere. Powered by Condigence LLP.

FOR WORKERS · 30 OCTOBER 2026

Worker Guide (Ji-Hajoor Pro)

Earn More. Serve Better.

This guide is for **workers**: plumbers, electricians, cleaners and technicians who take jobs through Ji-Hajoor, either on their own or as part of an agency's team.

Where: partner.jihajoor.com in any browser, or the **Ji-Hajoor Pro** app on Android and iOS.

---

1. Join Ji-Hajoor Pro

1. Open Ji-Hajoor Pro and sign up with your **mobile number** (6-digit SMS code), **email** or **Google**.
2. Passwords need at least 10 characters, with a letter and a digit. Easy-to-guess passwords and ones containing your name or email are refused.
3. Complete your profile:
    - **Services & skills:** the jobs you do (for example Plumbing, AC Service) and your years of experience.
    - **Service area:** your base location and how far you will travel.
    - **Availability:** always available, or only during the hours you set.
    - **Name shown to customers.**

2. Get verified

Customers only ever see verified workers, so this step comes first.

1. Open **Verification** and upload three documents as a clear photo or PDF:
    - **Government ID** (for example Aadhaar or PAN)
    - **Address proof**
    - **Skill certificate** (training or trade certificate)
2. Send all three together. Ji-Hajoor reviews them and then runs a **background check**.
3. Your status updates in the app. Once **Verified**, you start receiving job offers, and your public profile page goes live.

If a document is rejected, the app tells you why. Upload a clearer copy and send it again.

3. Take jobs

1. On the **Dashboard**, stay available to receive offers.
2. A **Job request** shows the service, area, time, and your estimated earnings. A timer shows how long you have to respond. Tap **Accept** or **Decline**.
3. Offers go to several nearby workers at once; the first to accept gets the job. If you see "Another worker accepted this job first", nothing is lost; the next offer will come.

Emergency jobs are marked **Emergency** and pay more.

4. Do the job

Open the job from **Active jobs**:

1. Tap **I'm on my way**. Your location is shared with the customer while you travel.
2. Tap **I've arrived**.
3. Upload a **before photo**. This unlocks **Start job**.
4. If you need **parts**, add each item (name, quantity, unit cost). The customer approves the new total in their app before you continue. If you have to stop (for example to fetch a part), use **Pause** and give a reason.
5. Upload an **after photo**. This unlocks **Complete job**.
6. Use **Chat** at any time to message the customer.

After you complete the job, the app shows "Waiting for the customer to pay", then "Paid — your earnings have been credited".

5. Earnings and payouts

- **Earnings** shows today's earnings, jobs completed and your **wallet balance**.
- Each job shows what the customer paid, the Ji-Hajoor platform fee, any agency share, and what you keep.
- To get paid, add your **bank account** (account holder name, account number, IFSC) in your profile, then tap **Request settlement**. Ji-Hajoor verifies your bank account before the first payout.

6. Reviews: your best advertisement

Customers rate every completed job on quality, timeliness, behaviour and price transparency.

- **My reviews** lists every review you received, newest first.
- Tap **Reply publicly** to thank the customer or explain a problem (up to 500 characters). You can edit your reply. Replies show under the review on your public page.
- Customers never see a reviewer's name, and you can't see it either; reviews are about the job.
- Your average rating helps the dispatch engine choose who gets the next offer, so good ratings bring more work.

Tips for great reviews: arrive on time, upload clear before and after photos, explain any parts before adding them, and leave the area clean.

7. Share your profile and win more customers

On **My profile**, the **Share my profile** card gives you a link to your public Ji-Hajoor page with your rating and reviews. Tap **Share** to send it on WhatsApp or SMS, or copy the link for your visiting card or social media. Customers who open it can book you through Ji-Hajoor.

8. Working with an agency

You can work **independently** or as part of an **agency's** team.

- An agency invites you using your mobile number. The invitation appears on your Dashboard and shows the agency's name and **the share of your earnings it keeps** (between 0% and 50%).
- You join only if you **accept**. You can decline.
- In an agency, you also get jobs that the agency assigns to you.
- You can **leave** the agency at any time from the agency card and go back to working independently.

9. Your account

On **My profile** you can update your services, service area and availability, change your password and sign out.

© 2026 Ji-Hajoor. Verified Help. Anytime. Anywhere. Powered by Condigence LLP.

FOR AGENCIES · 30 OCTOBER 2026

Agency Guide

This guide is for **agencies**: service businesses that run a team of workers and want to grow by taking Ji-Hajoor requests. (Some people call an agency an *agent provider*; in the apps it is always **agency**.)

Where: admin.jihajoor.com. An agency administrator sees the **My agency** pages: Requests, Team, Jobs and Earnings. Your workers use the **Ji-Hajoor Pro** app (see the Worker Guide).

How agencies fit in

Ji-Hajoor reaches customers through two channels:

1. **Independent workers** get job offers directly.
2. **Agencies** cover an area with their own team. When no independent worker accepts a request in time, it waits in the **Requests** queue of the agencies covering that area and service, and an agency assigns one of its verified workers.

Your workers also receive ordinary job offers directly, like independent workers. Every job they do, whichever way it reaches them, earns your agency its share.

1. Apply

1. Go to **admin.jihajoor.com → Register your agency**.
2. **Your account:** your name, email, mobile number and a password (at least 10 characters, with a letter and a digit). We email you a 6-digit code to confirm the address.
3. **Agency details:** agency name, contact email and phone, your base location, the **radius (km)** you cover and the **service categories** your team handles.
4. Tap **Submit application**. Ji-Hajoor reviews every agency before it receives requests, and emails you when your application is decided. If it is not approved, the reason is shown and you can apply again.

2. Your agency share

For each paid job one of your workers does:

```
What the customer pays for the service
  − Ji-Hajoor platform fee (10% in the starter pricing)
  = worker's net
      − your agency share (0–50%, agreed with Ji-Hajoor)  → your agency
      = what the worker keeps
```

Example: a ₹1,000 job with a 10% fee and a 10% agency share credits ₹100 to Ji-Hajoor, ₹90 to your agency and ₹810 to the worker.

3. Build your team

1. Open **Team → Invite a worker by mobile number**.
2. The worker sees the invitation in their Ji-Hajoor Pro app, **including your agency share**, and joins only if they accept. Invitations waiting for an answer are listed under *Waiting for an answer*.
3. A worker who is new to Ji-Hajoor must complete verification (documents and background check) before they can take jobs.
4. **Your team now** lists each worker's availability and verification status. You can remove a worker from your team; a worker can also leave and work independently.

4. Assign requests

1. **Requests** shows jobs waiting for your agency, with how long each has waited. The colour changes as a request nears its timeout, so act on the oldest first.
2. Tap **Assign** and pick a worker. Workers who are verified and available now are listed first.
3. The worker gets the job in their app straight away. The queue refreshes by itself.

5. Follow jobs and earnings

- **Jobs** lists every request your agency assigned, with its status.
- **Earnings** shows, for every paid job, the split between Ji-Hajoor, your agency and the worker, and your total. Payouts of the agency share are currently arranged with Ji-Hajoor outside the app.

6. Grow with reviews

Customers rate every job, and each worker has a public profile page showing the agency name with their rating and reviews. Good reviews mean your workers get more direct offers.

- Ask your workers to use **Share my profile** in the Ji-Hajoor Pro app with customers they meet.
- Coach workers to reply to reviews politely, especially critical ones.
- Brief your team: on time, before and after photos, explain parts before adding them, leave the place clean.

© 2026 Ji-Hajoor. Verified Help. Anytime. Anywhere. Powered by Condigence LLP.

FOR JI-HAJOOR STAFF · 30 OCTOBER 2026

Staff Guide (Ji-Hajoor Admin)

This guide is for **Ji-Hajoor staff** who run the marketplace day to day in **Ji-Hajoor Admin**.

Where: admin.jihajoor.com. Staff join by **invitation** only: a Super Admin invites you by email, and you set your password from the link (at least 10 characters, with a letter and a digit, and not built from your name or email).

Roles: who sees what

Role	What it is for	Pages
Super Admin	Owns the platform	Everything, plus System Configuration and editing Dispatch Rules
Admin	Runs operations	Dashboard, User Management, Workers, Verification Queue, Agencies, Service Categories, Pricing Configuration, Booking Management, Dispatch Rules (view), Payments & Refunds, Complaints, Review Moderation, Coupon Management, Notification Templates, Report Generation, Audit Logs
Finance Admin	Money	Payments & Refunds, Report Generation
Dispatcher	Matching	Booking Management, Dispatch Rules (view)
Support Agent	Customers and workers	Booking Management, Complaints, Review Moderation
Agency administrator	One agency's team	My agency pages only (see the Agency Guide)

Give each person the smallest role that lets them do their job. Every change is recorded in the **Audit Logs**.

Daily checklist

1. **Verification Queue:** approve or reject new workers' documents, then record the background check result. Approved workers start receiving offers.
2. **Agencies:** decide new agency applications and set each agency's share (0–50%).
3. **Complaints:** answer new complaints; approve refunds where they are justified.
4. **Review Moderation:** publish or remove reviews held for checking.
5. **Booking Management:** look for bookings stuck waiting for a worker.

Supply: workers and agencies

- **Workers** lists every worker with verification status, rating and agency. Verify a worker's **bank account** here before their first payout.

- **Verification Queue:** open a worker, check each document (Government ID, address proof, skill certificate), then **Approve** or **Reject** with a reason the worker will see. After approval, the worker waits for the **background check**; record **Passed** or **Failed** with a note.
- **Agencies:** approve or reject applications (the reason is shown to the applicant), set the agency share, edit the area and categories, and see each agency's team.

Catalogue, pricing and promotions

- **Service Categories:** add or edit categories and services, their starting price, duration and whether **Emergency** is offered. Icon links must be `https://` or a path on this site.
- **Pricing Configuration:** for each service, set the base price, per-km travel rate and cap, night and weekend surcharges, **platform fee rate**, tax rate, emergency and surge multipliers. The starter pricing uses a 10% platform fee and 18% GST.
- **Coupon Management:** create **flat** or **percentage** coupons with a minimum order value, maximum discount, validity dates, a per-customer limit and a total limit. Use them for launches, referrals and win-back campaigns.

Bookings and dispatch

- **Booking Management:** find any booking by reference, customer or worker, and see its full timeline.
- **Dispatch Rules:** the weights the engine uses to choose workers (distance, rating, acceptance history and so on) and its timeouts. Only a Super Admin can change them.

Money

- **Payments & Refunds:** every payment and its Razorpay reference; issue full or partial refunds. Each payment is credited once, however often Razorpay retries.
- Worker **settlement requests** (payouts to bank) are handled here, once the worker's bank account is verified on the Workers page.
- **Report Generation:** booking, revenue and settlement reports for a date range, as CSV or PDF.

Customers and quality

- **Complaints:** each complaint is linked to its booking. Investigate, respond, and approve a refund when needed; the refund goes back to the original payment method.
- **Review Moderation:** reviews that the fraud checks hold (for example from a brand-new account, a burst from one network address, or a rating far from the worker's usual) wait here. **Publish** genuine ones; **Remove** abusive or fake ones with a reason. A removed review cannot be published again.
- **Notification Templates:** edit the push, SMS, email and in-app wording for each event, including the **review reminder** sent once, a day after an unrated job, and the payment receipt that asks for a rating.

Platform

- **User Management:** find accounts, suspend or restore them, and invite staff with a role.
- **Audit Logs:** who changed what, and when.

- **System Configuration** (Super Admin): platform-wide settings, such as the app addresses used in links.

Security rules for staff

- Never share your password or sign-in codes, and never sign in on a shared computer without signing out.
- Ji-Hajoor will never ask you for your password by phone, chat or email.
- Report anything unusual (unexpected refunds, a review burst, a strange login) to the Super Admin straight away.

© 2026 Ji-Hajoor. Verified Help. Anytime. Anywhere. Powered by Condigence LLP.

BUSINESS · 30 OCTOBER 2026

Revenue Model

Last updated 30 October 2026. Figures marked live are what the platform does today; figures marked illustrative are planning assumptions, not results.

In one line

Ji-Hajoor earns a **platform fee on every paid job**. Customers see the fee as its own line before they book; workers see it on every job in their earnings; agencies earn their own share from their workers' jobs.

Who pays what

Party	Pays	Receives
Customer	The itemised price: service charges + platform fee + GST, less any coupon	A verified professional, live tracking, an invoice, the right to complain and be refunded
Worker	Nothing to join	The service earnings, credited to their wallet, paid out to their bank on request
Agency	Nothing to join	Its agency share (0–50%) of each job its workers do
Ji-Hajoor	Payment gateway costs, coupons, marketing	The platform fee

How a price is built (live)

Every service has its own pricing, set by Ji-Hajoor staff in **Pricing Configuration**:

Part	Starter value	Notes
Base price	₹299 to ₹1,499 per service	Tap repair ₹299, deep cleaning ₹1,499
Travel	₹8 per km, capped at ₹150	
Night surcharge	₹100	
Weekend surcharge	₹75	
Emergency	2× the base price	Only on services that offer emergency
Busy-time (surge)	1× (off)	Can be raised per service
Platform fee	**10% of the service charges**	Ji-Hajoor's revenue
GST	18%	Collected and paid to the government; not revenue
Coupon	Flat or % off, with caps and limits	A marketing cost

Worked example (live starter pricing): a scheduled tap repair, no travel or surcharges.

```
Service charges            ₹299.00
Platform fee (10%)         ₹ 29.90   → Ji-Hajoor
GST 18% on ₹328.90         ₹ 59.20   → government
Customer pays              ₹388.10
```

The same job as an **emergency** has ₹598 in service charges and earns ₹59.80 in platform fee. Emergency, night and weekend jobs earn Ji-Hajoor more because the fee is a percentage.

The agency split (live)

For a job done by an agency's worker:

```
worker's net (after the platform fee)
  − agency share (0–50%, set per agency)   → the agency
  = credited to the worker's wallet
```

A ₹1,000 job with a 10% fee and a 10% agency share credits ₹100 to Ji-Hajoor, ₹90 to the agency and ₹810 to the worker. An independent worker keeps the whole net.

Revenue streams

Live today

1. **Platform fee** on every paid job (10% starter rate, set per service).
2. **Higher-value jobs:** emergency (2× base), night and weekend jobs raise the fee in rupees.
3. **Cancellation fees** after a professional is on the way (set per service; ₹0 by default).

Next, using what is already built (proposals)

4. **Featured professionals:** top-rated workers pay to appear first on category pages. The public profile and rating pages now make this possible.
5. **Agency plans:** a monthly plan for agencies with more queue priority and a dashboard of their workers' reviews.
6. **Maintenance plans (AMC):** yearly AC, water purifier or appliance care, sold as a bundle of bookings with a discount, paid up front.
7. **Parts margin:** standard parts supplied through Ji-Hajoor at a small margin, already captured as parts on each job.
8. **Business accounts:** housing societies, offices and landlords booking many jobs with a monthly invoice.

Unit economics (illustrative)

Assumptions: average job ₹555 in service charges (the average of the eight starter services), 10% fee, payment gateway cost about 2% of the amount charged, coupons on 20% of jobs at ₹50 each.

Per job	₹
Platform fee (10% of ₹555)	55.50
Payment gateway (≈2% of ₹720 charged)	−14.40
Coupons (₹50 × 20%)	−10.00
Contribution per job	**≈31**

Jobs per day	Platform fee per month	Contribution per month
100	₹1.67 lakh	₹0.93 lakh
500	₹8.33 lakh	₹4.67 lakh
2,000	₹33.3 lakh	₹18.7 lakh

Levers that move contribution most: the fee rate per service, the share of emergency jobs, the average job value (deep cleaning and AC jobs), and coupon spend.

Market (external)

- India's home-services market was about **₹5.1–5.2 lakh crore** in FY25, and **under 1%** of it is booked online. (Redseer, via Outlook Business, Sept 2025)
- The online segment was **₹4,100–4,300 crore** in FY25 and is expected to grow **18–22% a year** to **₹8,500–8,800 crore** by FY30 (same source).
- The leading online player, Urban Company, reported its first annual profit in FY25 (₹28.5 crore), which shows the model can be profitable at scale. (Storyboard18)

Open item to settle before launch

At payment time, the payment service credits the worker the amount paid minus a **default 20%** (`default-platform-fee-percent` in `payment-service.yml`), applied to the whole amount charged including GST. The price estimate uses the **10%** per-service fee on service charges, and GST is included in what the worker is credited. Decide the intended split (with your accountant for GST), then align the payment service with the per-service rate before taking real money.

BUSINESS · 30 OCTOBER 2026

Brand, Naming and Marketing

Last updated 30 October 2026. Use this page whenever you write copy, design a creative, or name something new.

1. Naming conventions

The brand

Use	Don't use
Ji-Hajoor (capital J, hyphen, capital H)	Ji Hajoor, JiHajoor, Jihajoor, ji-hajoor, JH
jihajoor.com (in web addresses only)	
`JiHajoor` (in file names and code only, where a hyphen can't go)	

Ji-Hajoor is **Powered by Condigence LLP**. Every page, document and deck ends with:

> © 2026 Ji-Hajoor. Verified Help. Anytime. Anywhere. Powered by Condigence LLP.

The apps

App	Who it is for	Name in stores and on screen	Address	Tagline
Customer app	Customers	**Ji-Hajoor**	jihajoor.com	*Verified Help. Anytime. Anywhere.*
Partner app	Workers (and agencies' workers)	**Ji-Hajoor Pro**	partner.jihajoor.com	*Earn More. Serve Better.*
Admin portal	Ji-Hajoor staff and agency administrators	**Ji-Hajoor Admin** (agencies see **My agency**)	admin.jihajoor.com	—

In internal docs it is fine to say "customer app", "partner app" and "admin portal".

People and things

Say (to users and in docs)	Customer-facing wording	In code and APIs
Customer	you	`CUSTOMER`, `/customers/**`
Worker	**professional** (short: *pro*)	`Provider`, `SERVICE_PROVIDER`, `/providers/**`
Agency (an *agent provider* in sales talk)	agency	`Tenant`, `TENANT_ADMIN`, `/tenant/**`, `/admin/tenants`

Say (to users and in docs)	Customer-facing wording	In code and APIs
Ji-Hajoor staff	our team	`SUPER_ADMIN`, `ADMIN`, `FINANCE_ADMIN`, `DISPATCHER`, `SUPPORT_AGENT`
Booking / job	booking	`Booking`
Platform fee	platform fee	`platformFee`
Agency share	—	`sharePercent` on the tenant, `agencyShare` on earnings
Review / rating	rating, review	`Review`, `ReviewPrompt`
Public profile	profile and reviews	`/public/workers/{id}`
Verified (documents + background check passed)	Verified by Ji-Hajoor	`APPROVED`

Rules:

- Never show code names (`Tenant`, `Provider`) to users.
- Customers book a **professional**; workers see themselves as **workers** or **pros**; staff and agencies say **worker**.
- Service names use Title Case: *Tap / Faucet Repair*, *Full Home Deep Cleaning*, *AC Service*.
- Money is written ₹1,499 (no decimals unless needed), with Indian grouping (₹1,50,000 or ₹1.5 lakh).
- File names in `docs/`: `UPPER_SNAKE.md` for documents, `JiHajoor_Title_Case.pptx` for decks, and the same name with `.pdf` in `docs/pdf/`.

2. Brand identity

Promise

Verified help you can trust, at a fair price you see before you book.

Three proofs we repeat everywhere:

1. **Verified:** every professional passes document checks and a background check.
2. **Transparent:** an itemised price before you book; parts approved by you before you pay.
3. **Accountable:** live tracking, in-app chat, public reviews, and a real person on every complaint.

Voice

Warm, plain and direct, like a helpful neighbour. Short sentences. Say what happens next. Avoid jargon, exclamation marks and promises we can't keep ("100% safe", "never late").

Instead of	Write
"Leverage our best-in-class service ecosystem"	"Book a verified plumber in two minutes."
"Your request is being processed"	"Finding you a professional."
"Unacceptable rating detected"	"We're checking this review before it appears."

Colours

Role	Customer app (Ji-Hajoor)	Partner app (Ji-Hajoor Pro)
Primary	Ji-Hajoor Blue `#2251D1`	Pro Teal `#0F766E`
Deep	`#0F2A6E`	—
Accent	Marigold `#F2A516`	Marigold `#F2A516`
Success	`#12875A`	`#12875A`
Text	Ink `#0F0F0F` , Body `#344054`	same
Background	Canvas `#F7F8FA` , Paper `#FFFFFF`	same

Use blue for customer-facing material, teal for worker recruitment, and marigold sparingly for one highlight per creative (a price, a badge, a call to action).

Typography

The apps use **Plus Jakarta Sans**, falling back to the system font. Decks and print use **Calibri** for body text and **Cambria** for headings, which every Office install has.

3. Marketing plan

Who we are talking to

Audience	What they want	Message
Urban households (25–45, working, renting or owning)	Someone reliable, today, at a fair price	*Verified help in minutes. See the price first.*
Housing societies and RWAs	One trusted vendor for many homes	*One app for every flat's repairs, with reviews you can check.*
Independent workers	More jobs, fair pay, respect	*Earn More. Serve Better. Your reviews bring the next job.*
Agencies	Fill idle team time without more sales staff	*Ji-Hajoor sends the requests; you keep your share.*

Launch playbook (one city at a time)

1. **Supply first (weeks 1–4).** Recruit and verify 50–100 workers across the four starter categories through agencies, trade schools and WhatsApp groups. Offer a small joining bonus after a worker's first five rated jobs, paid from the marketing budget.
2. **Seed demand (weeks 3–8).** Launch coupons in Coupon Management: `FIRST100` (₹100 off the first booking, minimum ₹299, one per customer) and `SOCIETY15` (15% off, capped at ₹150, for partner societies). Partner with 10–20 housing societies for notice-board QR codes and WhatsApp groups.
3. **Reviews engine (from day 1).** Every paid job asks for a rating; a reminder the next day; workers share their public profile pages. Target: 40% of paid jobs reviewed.

4. **Retention.** Monthly "home check" reminders (AC before summer, plumbing before monsoon), and maintenance plans once demand is steady.

Channels

Channel	Use	Measure
Worker profile sharing (WhatsApp, visiting cards)	Free, trusted word of mouth	Profile opens, bookings from profile
Housing societies and RWAs	Dense demand at low cost	Bookings per society
Google Search and Maps	"plumber near me" intent	Cost per booking
Instagram and YouTube Shorts	Before/after job videos, worker stories	Views, sign-ups
Referral coupons	Customers invite neighbours	Coupon redemptions
Local press and radio	City launch	Downloads in launch week

Content ideas

- **"Meet your pro"** — 30-second videos of verified workers with their rating.
- **"Price before you book"** — screen recording of the itemised estimate.
- **Before/after** — job photos (with customer consent).
- **Season guides** — "5 checks before summer" (AC), "Monsoon-proof your home" (plumbing, electrical).

What to measure every week

Bookings, repeat-customer rate, cancellation rate, average rating, share of paid jobs reviewed, time to accept, complaints per 100 jobs, verified workers active, and coupon cost per new customer.

Rules for promotions

- Coupons are created only in Ji-Hajoor Admin, with an expiry date, a per-customer limit and a total limit.
- Never promise a fixed price outside the app; the estimate is the price.
- Use real reviews only, never invented quotes or ratings. Ask workers and customers for consent before using their photos or names.

Ji-Hajoor

Verified Help. Anytime. Anywhere.

Pitch deck · October 2026 · Powered by Condigence LLP

Finding a trustworthy pro is still a gamble

Most home repairs are still booked by word of mouth: no checks, no price list, no recourse

Trust

A stranger in your home with no ID check, no history and no one to call if it goes wrong.

Surprise prices

The quote changes at the door, and parts are added without asking.

No-shows

Late or missed visits, with no way to see who is coming or when.

Under 1% of India’s ₹5.1 lakh crore home-services market is booked online (Redseer, FY25).

One marketplace, three apps, built on trust

Each side of the market gets an app designed for its job

JIHAJOOR.COM

Ji-Hajoor

For customers: book in two minutes, see the price first, track and chat live, pay and rate.

PARTNER.JIHAJOOR.COM

Ji-Hajoor Pro

For workers: get verified, take jobs nearby, record photos and parts, get paid, build reviews.

ADMIN.JIHAJOOR.COM

Ji-Hajoor Admin

For staff and agencies: verification, pricing, dispatch, refunds, moderation; My agency for teams.

How it works

From a tap on Book to a public review

Book

Pick a service, place and time. See the itemised price.

Match

Nearby verified pros get the offer. First to accept wins.

Track

Live map and chat. The customer approves any parts.

Pay

UPI, card, net banking or wallet. GST invoice at once.

Rate

Asked after paying, one reminder. Public review, worker replies.

Every step leaves a record both sides can see: the estimate, chat, job photos, the invoice and the review.

Trust is the product

Four guarantees every booking carries

Verified professionals

Government ID, address proof and skill certificate checked, then a background check.

Price before you book

An itemised estimate up front. Parts need the customer’s approval.

Live and accountable

Tracking, chat, and complaints answered by a real person, with refunds.

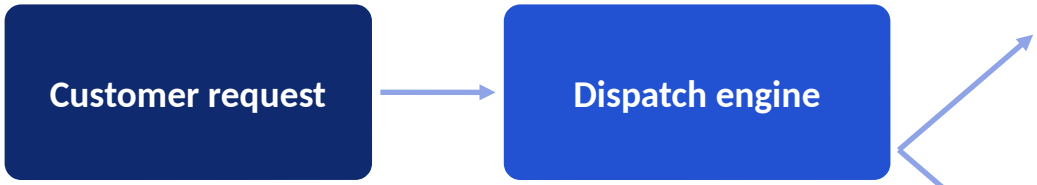

Honest reviews

Only from paid jobs, fraud-checked, anonymous, with the worker’s reply.

Two supply channels, so jobs get done

Independent workers first; agencies catch whatever is left

Agencies keep a 0–50% share of their workers' net, set per agency.

Independent workers

Offered first, by distance, rating and track record. First to accept wins.

Agency queue

No one in time? The covering agency assigns a verified team member.

A huge market, barely online

India home services, by Redseer

Contribution	**≈31**

Go to market one city at a time

Supply first, then demand, with reviews from day one

Supply

Weeks 1–4: verify 50–100 workers through agencies and trade schools.

Demand

Weeks 3–8: launch coupons and housing-society partnerships.

Reviews

Day 1 on: rate every job; workers share their profile pages.

Retain

Month 3 on: seasonal reminders, maintenance plans, next city.

Targets: 50–100 verified workers before demand campaigns; 40% of paid jobs reviewed.

Built, tested and live today

jihajoor.com, partner.jihajoor.com and admin.jihajoor.com

3

apps on web, Android and iOS

20

backend services in 5 deployables

10

automated CI workflows

0

known npm vulnerabilities

Secure by design

HttpOnly sessions, BCrypt passwords, WAF, rate limits.

Real payments

Razorpay with signature checks; credited once.

What comes next

Revenue and reach on top of what is built

Featured pros

Top-rated workers pay to appear first.

Agency plans

Queue priority and review insights.

Maintenance plans

Yearly AC and appliance care, paid upfront.

Business accounts

Societies and offices on monthly invoices.

Also next: device push notifications, more categories, and the second city.

Revenue Model

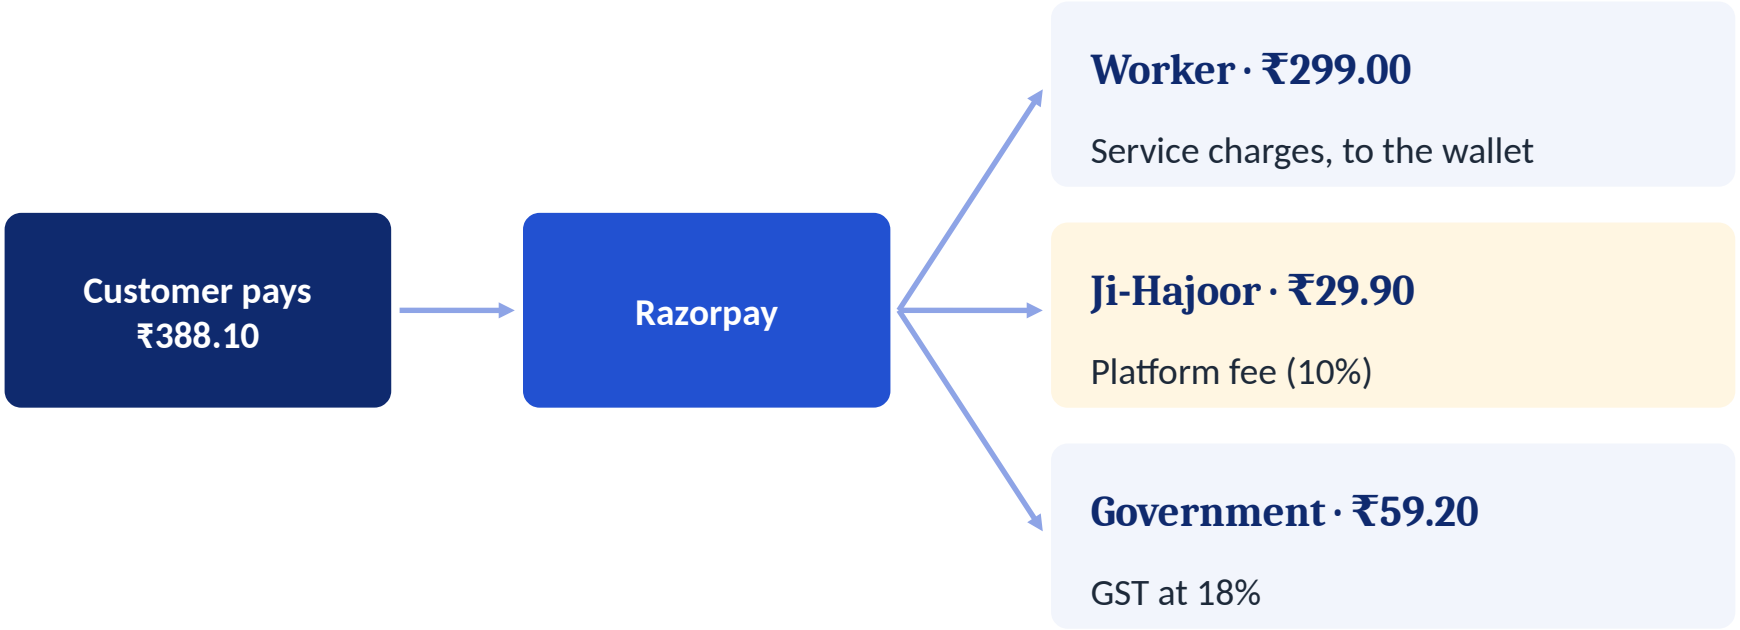

How Ji-Hajoor earns on every job

Updated 30 October 2026 · Live figures and illustrative plans

How money moves on every job

One payment from the customer, split four ways

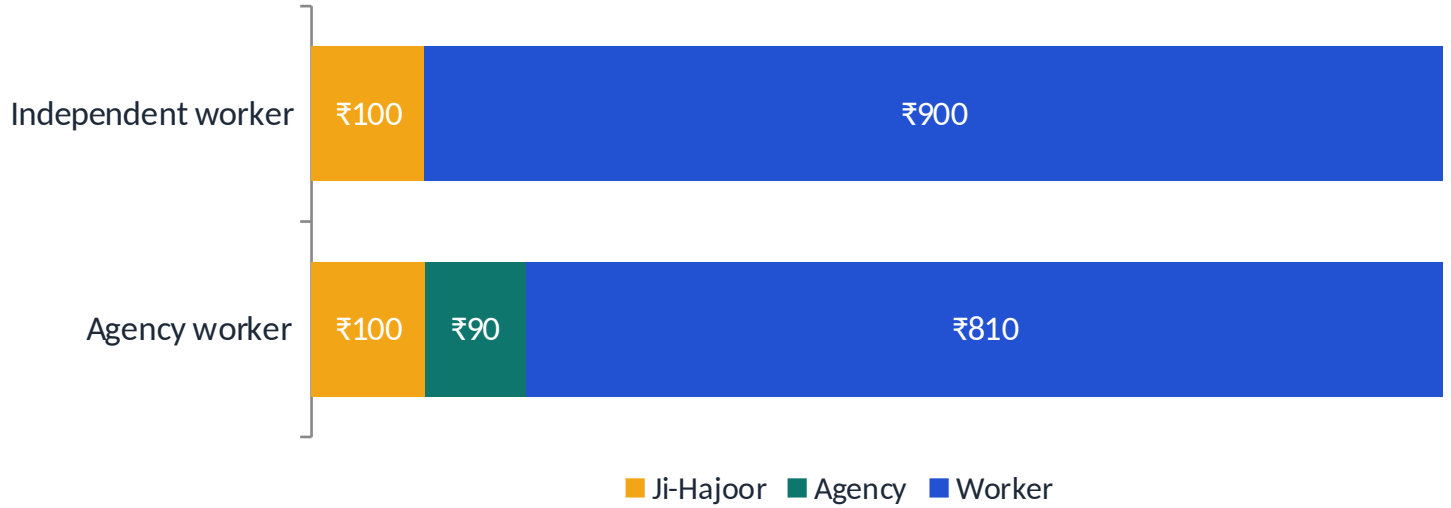

Every price is itemised before booking

Starter values, set per service in Pricing Configuration

Part	Starter value	Who keeps it
Base price	₹299 to ₹1,499 per service	Worker
Travel	₹8 per km, capped at ₹150	Worker
Night / weekend surcharge	₹100 / ₹75	Worker
Emergency	2× the base price	Worker
Platform fee	**10% of service charges**	**Ji-Hajoor**
GST	18%	Government
Coupon	Flat or % off, capped	Paid by Ji-Hajoor

Agencies earn from their workers' jobs

A ₹1,000 job with a 10% fee and a 10% agency share

Agencies bring teams without Ji-Hajoor paying for recruitment; workers choose to join and can leave.

Revenue streams: live today and next

The next four reuse parts that are already built

LIVE TODAY

Earning now

- Platform fee on every paid job
- Emergency (2× base), night and weekend jobs
- Cancellation fees once a pro is on the way

NEXT

Proposed

- Featured professionals
- Agency plans
- Maintenance plans (AMC)
- Parts margin and business accounts

About ₹31 per job after costs

Illustrative, at starter pricing

Per job	₹
Platform fee (10% of ₹555)	55.50
Payment gateway (≈2% of ₹720)	−14.40
Coupons (₹50 × 20%)	−10.00
Contribution per job	**≈31**

₹55.50

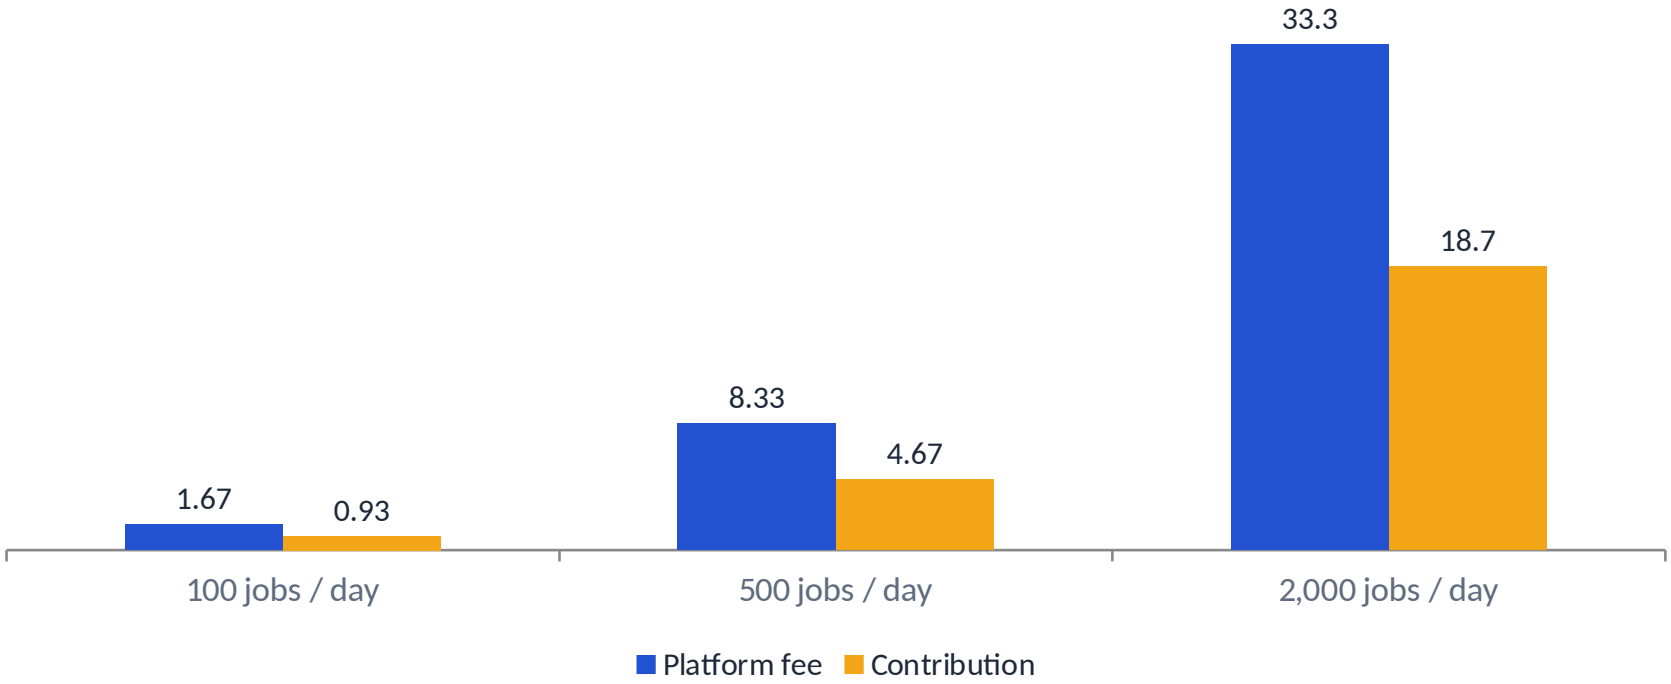

platform fee on an average job

≈56%

of the fee left after payment and coupon costs

Contribution grows with volume

Per month, ₹ lakh (illustrative)

Four levers we control

All four are settings in Ji-Hajoor Admin

Fee rate per service

Higher on specialist jobs, lower where price-sensitive.

Emergency share

Emergency jobs earn twice the fee in rupees.

Job value mix

Deep cleaning and AC jobs lift the average.

Coupon spend

Caps, limits and expiry on every coupon.

To settle before taking real money

Decisions for the founders

Align the fee

Payment takes 20% of the total; estimates show 10%. Pick one.

GST treatment

Confirm with your accountant who collects and pays it.

Go live on Razorpay

Add live keys and switch the payment simulator off.

Agency payouts

The agency share is a ledger today; pay it out monthly.

A transparent fee that grows with every trusted job

100% safe, guaranteed	Every pro passes ID and background checks.

MARKETING PLAN

Win one city, then the next

Supply first, seeded demand, and a reviews engine that turns every good job into the next booking.

Four audiences, four messages

Who we talk to and what we tell them

Households

“Verified help in minutes. See the price first.”

Societies

“One app for every flat’s repairs, with reviews you can check.”

Workers

“Earn More. Serve Better. Your reviews bring the next job.”

Agencies

“We send the requests; you keep your share.”

Launch playbook

One city at a time

Supply

Weeks 1–4: recruit and verify through agencies, trade schools, WhatsApp groups.

Seed demand

Weeks 3–8: FIRST100 and SOCIETY15 coupons; 10–20 society partners.

Reviews

Day 1 on: every job rated; workers share their public pages.

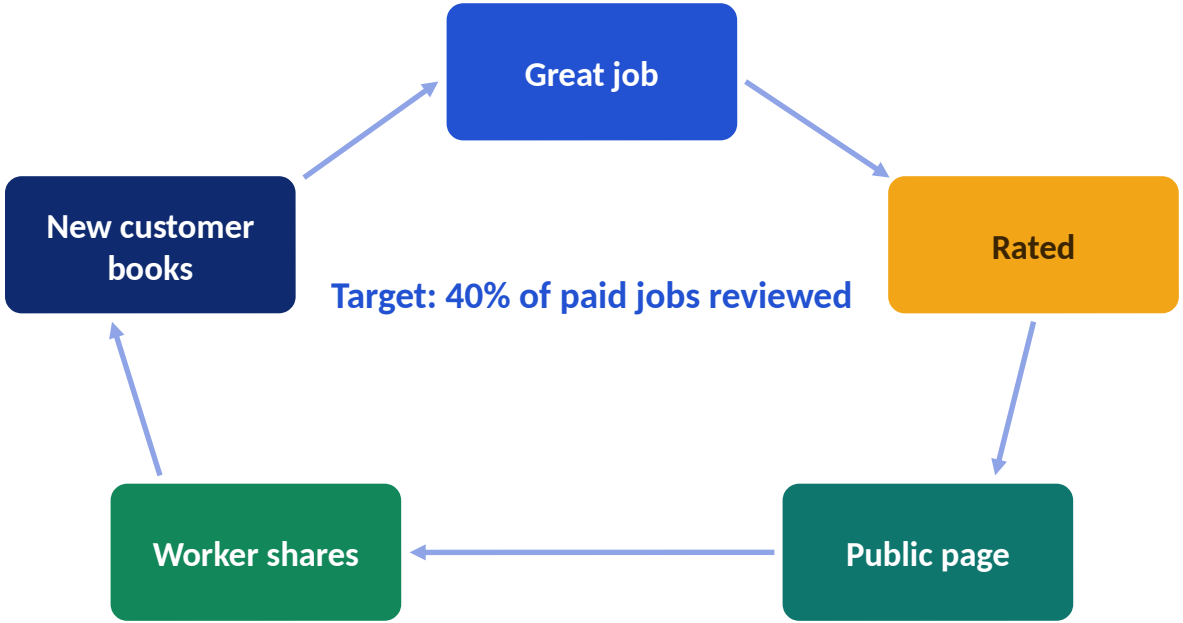

Retain

Month 3 on: seasonal reminders and maintenance plans.

Measure weekly: bookings, repeat customers, average rating and the share of paid jobs reviewed.

The reviews flywheel

Every good job markets the next one, for free

Channels and how we measure them

Start with the free and dense channels

Channel	Use	Measure
Worker profile sharing	Trusted word of mouth, free	Profile opens, bookings
Housing societies, RWAs	Dense demand, low cost	Bookings per society
Google Search and Maps	“Plumber near me” intent	Cost per booking
Instagram, YouTube Shorts	Before/after videos, pro stories	Views, sign-ups
Referral coupons	Customers invite neighbours	Redemptions

What we measure every week

Nine numbers on one page

Bookings	**Repeat customers**	**Cancellation rate**
Average rating	**Jobs reviewed**	**Time to accept**
Complaints / 100 jobs	**Active verified workers**	**Coupon cost / new customer**

Rules for promotions

Coupons are created only in Ji-Hajoor Admin

FIRST100

₹100 off the first booking; min ₹299; once per customer.

SOCIETY15

15% off, capped at ₹150, for partner societies.

The estimate is the price

Never promise a price outside the app.

Real reviews only

No invented quotes; get consent for photos.

One name, one promise, every time

Technology & Security

How Ji-Hajoor is built and protected

Updated 30 October 2026 · Tech stack, security review and reviews engine

At a glance

An event-driven marketplace on Railway, ready for AWS

3
apps: web, Android, iOS

20
services in 5 deployables

14
event types, via Kafka

10
CI workflows

Live on Railway

Every app and service deploys from one repository on each merge.

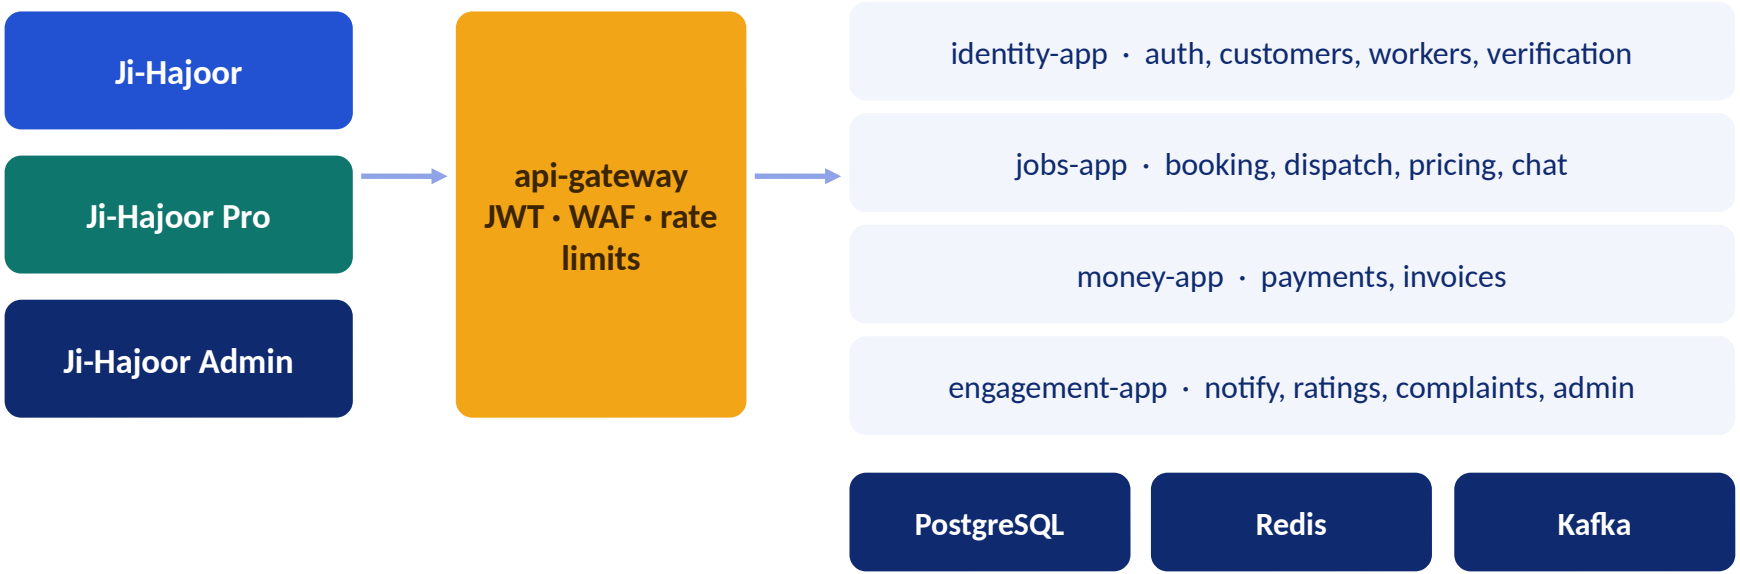

Ready for AWS

EKS, RDS and MSK prepared in Terraform and Helm.

Every change runs unit tests, lint, security scans and a full booking-to-review test before production.

One gateway in, four deployables behind it

Apps → nginx → api-gateway → services → data

Partners: Razorpay · MSG91 SMS · Google and Apple sign-in · Email (SES) · S3

Tech stack

Mainstream, well-supported choices at every layer

Layer	Choice
Apps	React 19, TypeScript, MUI, Vite; Capacitor for Android and iOS
Backend	Java 25, Spring Boot 4.1, Spring Cloud Gateway
Data	PostgreSQL (a schema per service, Flyway), Redis
Events	Kafka with a transactional outbox
Hosting	Railway (Docker) today; AWS EKS, RDS, MSK ready in Terraform and Helm
CI/CD	GitHub Actions; gitleaks, Trivy and npm audit on every change
Partners	Razorpay, MSG91, Google and Apple sign-in, SES email, S3

SECURITY REVIEW · 30 OCTOBER 2026

Secure by design, checked on every change

Defence in depth from the browser to the database. No system can promise it cannot be hacked; this is how we make it hard.

Security in four layers

What protects users today

Edge and browser

HTTPS + HSTS, strict CSP, no framing, WAF, IP rate limits, logs without query strings.

Identity

Short-lived JWT checked twice, role rules on every endpoint, refresh token in an HttpOnly cookie.

Data

BCrypt passwords, strong password policy, schema per service, uploads checked by content.

Money and supply chain

Razorpay signatures, credited once; secret scanning, dependency and image scans.

What the 30 October review fixed

Six findings, all fixed and deployed

Finding	Fix
Refresh token readable by page scripts	HttpOnly, Secure, SameSite=Strict cookie scoped to /api/auth
Weak passwords accepted	10+ chars, letter and digit; no common, leet, sequence or personal passwords
Rate limits keyed on a spoofable header	Railway’s X-Real-IP, then the last proxy hop
Photo and icon links unchecked	Only https:// or same-site paths; no javascript: or data:
Codes and tokens in web-server logs	Query strings masked in nginx access logs
Known npm vulnerabilities	Updated: 0 in all three apps

The reviews engine

New on 30 October: more reviews, more trust, more bookings

Paid

PaymentCompleted opens a review prompt

Asked

Receipt, Rate card and Home banner

Reminded

Once, after 24 h, by push, SMS and in-app

Checked

Fraud checks hold doubtful reviews for staff

Public

Shown on the worker’s page; the worker replies

Public pages never show who wrote a review, and exist only for verified workers.

New endpoints

All behind the gateway; public ones are read-only

Endpoint	Who	Purpose
GET /reviews/prompts/mine	Customer, worker	Jobs waiting for my rating
GET /reviews/received	Worker	Reviews I received
POST /reviews/{id}/reply	Worker (reviewee)	Reply publicly, up to 500 chars
GET /public/workers/{id}	Anyone	Verified worker’s public profile
GET /public/workers/{id}/reviews	Anyone	Rating summary and reviews, paged

From commit to production

Every push to main deploys all services on Railway

Test

Build and unit tests; each failure annotated

Check

Lint, types, gitleaks, Trivy, npm audit

Prove

Booking flow: sign-in to payment to review

Deploy

Merge to main; Railway deploys all services

Verify

Smoke test against the live site

Decisions still open

Owned by the founders; none changed without approval

Go live on payments

Switch the simulator off; add Razorpay live keys.

Remove the fixed OTP

Once MSG91 delivery is confirmed.

Rotate secrets

JWT_SECRET and the test staff password.

Align the platform fee

Payment uses 20% of total; estimates show 10%.

Built to be trusted, tested on every change
